

**CALIFORNIA STATE SCIENCE FAIR
2006 PROJECT SUMMARY**

Name(s) Rona Rae Jergenson	Project Number J1018
Project Title Quick, Grab It!	
<p style="text-align: center;">Abstract</p> <p>Objectives/Goals The objective is to see who has the fastest reflexes Boys or Girls</p> <p>Methods/Materials Gridbeam building material, a magnet, plexiglas,nuts and bolts, and a dowel. I'm trying to eliminate humman error.</p> <p>Results The boys have the fastest reflexes and their average was 6.7 and the Girls reflexes were 8.10</p> <p>Conclusions/Discussion My hypothesis was correct, because boy's concentrated and the girl's just started to laugh</p>	
Summary Statement My project tests who has the fastest reaction time, Boys or Girls	
Help Received Dad helped build reflexe tester
