

**CALIFORNIA STATE SCIENCE FAIR
2015 PROJECT SUMMARY**

Name(s) Tara L. Cole	Project Number J0704
Project Title Can You Pass an Eighth Grade Science Quiz?	
Abstract Objectives/Goals To find out if adults with different levels of education could pass an 8th grade science quiz with a score of 70% or better. Methods/Materials I used a basic 8th grade science quiz I found online Results Adults with higher levels of education generally did better on the quiz Conclusions/Discussion Not one person was able to score 100% on the quiz. It was very difficult to find adults that were willing to take the quiz. I found out that even adults are nervous to take a pop quiz. Many were actually embarrassed that they did not pass.	
Summary Statement Did higher level of education make a difference in passing an 8th grade science quiz	
Help Received Grandmother helped me with the placement of materials on the board
