

**CALIFORNIA STATE SCIENCE FAIR  
2008 PROJECT SUMMARY**

<b>Name(s)</b> <b>Taryn T. Frazier</b>	<b>Project Number</b> <b>J1114</b>
<b>Project Title</b> <b>What Type of Music Affects My Dog's Mood?</b>	
<b>Abstract</b> <b>Objectives/Goals</b> I wanted to know how my dog reacted to all the different types of music. He seemed like kind of an old soul dog and I wanted to know if he really was. <b>Methods/Materials</b> First I took Max onto the porch of my grandma's house and calmed him down. Next, I took the music I had downloaded on my Ipod 2 weeks before the project and played 1 different type of music everyday. After each day I recorded the data. <b>Results</b> Max reacted best to Heavy-Metal,Jazz,and Country. <b>Conclusions/Discussion</b> In conclusion, I learned alot from my project/expirement and I was completely wrong in my hypothesis. I really liked the concept of this project and am definetely going to try something similar to it next year.	
<b>Summary Statement</b> To find out what affected my dog's mood.	
<b>Help Received</b> My dad helped with the set-up of my display board.
